Rooftop Service Training

This program is structured to provide basic classroom instruction, demonstrations and “hands-on” exercises designed to familiarize the student with the product features, installation requirements and service procedures for McQuay Applied Rooftops.

Each student will work with simulators for MicroTech II[®] and MicroTech III[®] control systems. The emphasis of “hands-on” training will be to enhance the technician’s knowledge of good service and troubleshooting practice.

In the shop, students will complete exercises on a working rooftop unit.

To get the most from the course, the student should have an understanding of the refrigeration cycle, basic electrical power and simple air conditioning control circuits. The course will use these basic concepts to develop an understanding of the McQuay Rooftop products.

All scheduled sessions are held in our modern Training Center in Plymouth, Minnesota.

Course Fee:

\$1,400.00

Per student payable to
McQuay International

Fee Includes:

All instruction and work materials
Daily lunches and coffee breaks
Group Dinner (first night)

Payment is due in advance.
